

Lightning Conductor Pads

Product Ref: (DsA1-0111)
Issue No: 01

PRODUCT DESCRIPTION

Protection against the elements is critical to ensure the longevity of any building. At Langley we stock a wide range of lightning conductor pads to accommodate a variety of applications. The incorporated clips are manufactured from a high quality polymer which is extremely strong and has excellent UV repellent properties, keeping it from fading and going brittle in the sun's rays.

APPLICATION

The conductor pads are easy to use and are supplied as a one piece product without any screw-on attachments, and will accommodate a conductor strip 25mm wide by 5mm thick. The conductor pads also have a generous 100mm x 100mm flange for securing to the membrane.

The conductor pads have been designed with protection for the membrane in mind; the fixing rivet being recessed into the underside of the clip to eliminate any wear on the membrane. They are available to suit most standard membranes - if a bespoke product is needed, please contact the sales office to discuss your requirements.
