

## Langley Metal Hard Edge

Product Ref: (DsA25-0917)  
Issue No: 01

### DESCRIPTION

**Langley Metal Hard Edge** is a purpose made pre-fabricated metal angle that protects insulation board edges from compression when changes of level are encountered. Fabricated from sturdy and robust galvanised steel, it replaces a traditional timber hard edge and provides an ideal solution for both new and refurbishment applications.

### USE

**Langley Metal Hard Edge** is designed to be installed on all insulation edges where the insulation boards can be vulnerable to compression after continuous foot traffic or other imposed loads. Typically specified at gutters edges, changes of level or any other situation where the insulation edges need to be strengthened.

### CONSTRUCTION

A prefabricated once bent metal angle manufactured from structural grade galvanised steel.

### DIMENSIONS

- Length 3000 mm
- Width / Height 50 x 50 mm
- Thickness 0.7 mm

### APPEARANCE

Plain galvanised metal with no coating

### ENVIRONMENTAL AND QUALITY STANDARDS

The production of this product is certified according to ISO 9001:2000

### INSTALLATION

Can be secured with suitable membrane straps or partially bonded with a low foaming adhesive.

### STORAGE

**Langley Metal Hard Edge** should be stored under cover on a clean, continually supported surface clear of the ground. Angles stored on uneven surfaces may result in lengths bowing making suitable installation difficult.
