Ensure good ventilation.

The use of respiratory protective hood is recommended because time limitations apply without the correct use of PPE.

Protection of hands:

Preventive skin protection: The use of barrier creams is recommended.

Protective gloves:

Check condition of protective gloves prior to each use.

The glove material has to be impermeable and resistant to the product/substance/preparation.

In selecting the glove material consideration should be given to the penetration times, rates of diffusion and the degradation.

After gloves have been removed wash hands with an industrial hand cleaner.
