

Paratene

Product Ref: (DsC53-0416)
Issue No: 01 Apr-16

1. PRODUCT AND COMPANY IDENTIFICATION

1.1. Product Identifier

Product Name Paratene
Type of Product Bituminous Membrane

1.2. Supplier Details

Langley Waterproofing Systems Limited Langley House,
Lamport Drive,
Heartlands Business Park,
Daventry,
Northants,
NN11 8YH
Phone : 01327704778
Fax : 01327704845
Email : enquiries@langley.co.uk
Web : www.langley.co.uk

2. HAZARDS

These are combustible products (flash point > 230 °C approx.) and are not classified as hazardous for health and the environment pursuant to the directive on "compounds". Their application is envisaged at room temperature and does not involve risks of exposure to harmful dusts and vapours: they must nonetheless be handled with all the precautions usually taken for chemical compounds containing not completely inert substances or in very small concentrations if harmful.

3. COMPOSITION INFORMATION

Substances hazardous for health and the environment (in conformity with Enclosure A of Law Decree 16 July 1998 no. 285, updated according to Directive 1999/45/EC).

NAME	C.A.S.	%	Symbol	Risk phrases
BITUMEN (residue of petroleum vacuum distillation)	8052-42-4	75 - 90	(*)	(*)

(*) substance not classified by EC - fume exposure limits are available (ACGIH)

(°) classification of manufacturer

In making the product, other substances are used (copolymers styrene-butadiene and styrene-isopropene, polybutene, aliphatic hydrocarbon resins, additives, metal laminates) not classified as hazardous pursuant to Law Decree 3 February 1997 , no. 52 and subsequent updates.

4. FIRST AID MEASURES

In normal handling and use conditions, no acute exposure effects or facts occur that involve the physical integrity of adequately trained operators.

Inhalation the products do not present any specific risks of inhalation during application.
Skin no skin contamination conditions occur during application
Ingestion and eyes given the physical characteristics of these compounds no risk situations exist.

Paratene

Product Ref: (DsC53-0416)
Issue No: 01 Apr-16

5. FIRE-FIGHTING MEASURES

Recommended extinguishing media alcohol-resistant foam, CO₂, powders, water spray. Do not use jets of water.

Recommendations combustion produces fumes and harmful vapours. Exposure to decomposing products can cause health problems. It may be necessary to use adequate breathing devices. Cool any products exposed to fire or heat with water.

6. ACCIDENTAL RELEASE MEASURES

Individual precautions, environmental precautions and cleaning methods: given the physical characteristics of the products, situations of this type are not expected.

7. HANDLING AND STORAGE

7.1. Handling

The product must be used by adequately trained persons in compliance with standards of good working methods applied to this operating situation. In the area of use, for work hygiene reasons, we advise against smoking, eating and drinking.

7.2. Storage conditions

Keep to the instructions on the label. Store at room temperature in a dry place away from heat sources and direct sunlight, as well as from all flames and sparks.

8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

Engineering precautions and protective measures. Working environments must be adequately ventilated in order to eliminate any fumes or vapours that could form in the environment following preparation of the supports on which to apply the products. Wash hands when breaking off work and at the end of work shifts. Keep the product away from food, drinks and animal feed.

8.1. Professional exposure limits (ACGIH 2001)

SUBSTANCE	TLV-TWA*		STEL**	
	ppm	mg/m ³	ppm	mg/m ³
BITUMEN (fumes)	---	0.5	---	---

* limit for prolonged exposure ** for brief exposure

8.2. Personal protection - airways:

In normal conditions of use, the use of specific means of airways protection is not necessary.

8.3. Protecting the hands

In case of regular product handling, use protective gloves: in special operating conditions, the possibility exists of being cut or injured. Protective creams can be useful for better protecting exposed skin areas.

8.4. Protecting the eyes

In normal conditions of use, safety eyewear is not needed. With high light conditions i.e. direct sunlight, use tinted glasses to protect eyes against the effects of reflection from the aluminium surface.

8.5. Protecting the skin

Wear standard overalls and protective clothing.

Paratene

Product Ref: (DsC53-0416)
Issue No: 01 Apr-16

9. PHYSICAL AND CHEMICAL PROPERTIES

Physical state	Solid laminated
Colour	Blackish, metallic
Odour	Characteristic of bitumen
Flash point	230°C - ASTM D93
Self-ignition temperature	> 300°C
Resistance to temperature	-40°C +80°C
Specific weight at 20°C	1.02-1.08g/cm ³
Vapour density	N/A
Solubility in water	not mixable
pH	N/A
Viscosity	N/A

10. STABILITY AND REACTIVITY

The product is stable in recommended storage and use conditions (see section 7). Keep away from oxidising agents and strong acids to prevent exothermic reactions.

11. TOXICOLOGICAL INFORMATION

No specific information is available on the compound.

The following information refers to the toxicological behaviour of components:

Bitumen (according to SAX's): moderately toxic in case of skin contact - low toxicity from swallowing - if heated to decomposition, emits acrid fumes and irritating vapours.

Acute toxicity	LD/50 (oral/rat)	> 5000 mg/kg
	LD/50 (skin, adult rabbit)	> 2000 mg/kg

Anomalous exposure to product vapours heated to high temperatures can cause irritation of mucous and airways.

12. ECOLOGICAL INFORMATION

No specific information is available on the compound as such; the compound is not however included among those classified as hazardous for the environment. Use in accordance with good working practices, avoiding discarding in the environment by virtue of the product's generic polluting power.

13. DISPOSAL CONSIDERATIONS

The remains of the product, the wastes associated with its use and empty containers must be disposed of in accordance with applicable regulations. (Through companies specialised in waste disposal) Do not discard in the environment.

14. TRANSPORT INFORMATION

Keep to the rules established by the ADR for road transport, RID for rail transport, IMDG for sea transport, ICAO/IATA for air transport. - ADR/RID: THE COMPOUNDS ARE NOT CLASSIFIED AS HAZARDOUS - IMDG: THE COMPOUNDS ARE NOT CLASSIFIED AS HAZARDOUS SEA POLLUTANT: No

15. REGULATORY INFORMATION

Safety Data Sheet Rev.03 del 13.06.12 Elotene DSN Page 4 In conformity with the provisions of Law Decree 16 July 1998 no. 285 (and Directive 1999/45/EC) the products do not require specific hazard labels:

Hazard Symbols	not required
Contains	evidence of components not required - (does not contain substances classified as hazardous)
Risk Phrases	-----
Safety Phrases	-----

Reference is made, where applicable, to the following legal provisions concerning work safety:

- Presidential decree - 303/1956
- Law decree - 277/1991
- Law decree - 626/1994
- Law decree - 25/2002
- Law decree - 242/1996 16

16. ADDITIONAL INFORMATION

SOURCE OF INFORMATION:

- Threshold Limit Values (TLV) for chemical substances (ACGIH ed.2001)
- Registry of toxic effects of chemical substances (NIOSH 1987)
- Community Directives on hazardous "substances" and on "compounds"
- SAX'S: Dangerous Properties of Industrial Chemicals

17. OTHER INFORMATION

The information on this safety data sheet is based on the best information currently available and is in compliance with the provisions of Directives 2001/60/EC, 2001/59/EC, 2001/58/EC. The product must not be used for purposes different to those indicated in section 1 without having obtained prior written instructions. No liability can be accepted for improper uses. The user shall always be responsible for conforming to the regulations on hygiene, safety and protection of the environment provided by applicable laws. The information contained on this sheet shall be deemed as a description of product characteristics for safety purposes: it shall not be deemed as a guarantee of the properties of the product itself

18. LEGAL DISCLAIMER

The above information is believed to be correct but does not purport to be all-inclusive and shall be used only as a guide. This company shall not be held liable for any damage resulting from handling or from contact with the above product. The information contained in this data sheet does not constitute an assessment of workplace risk as required by current legislation. Whilst every care is taken to see that the information is correct and up to date, it is not intended to form part of any contract or give rise to any collateral liability, which is hereby specifically excluded.

For further information, contact Technical Services at Daventry, Northants. Telephone (01327) 704778.
